

FINN and FINN 2.0 metal roof tiles

New in the offer

FINN

FINN 2.0

THE POWER OF ROOFS

Classic FINN
metal roof tiles

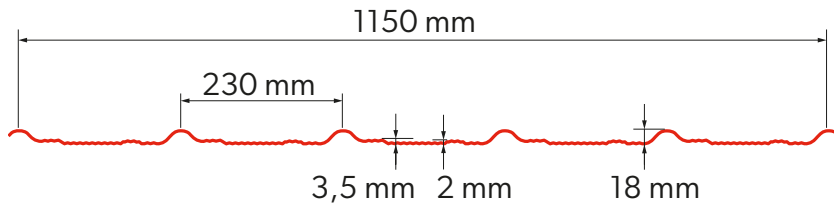

Technical
information

The FINN metal tile, a novelty in the BP2 offer, is a result of further modern technical solutions. Due to its unique aesthetics, the original profile is a product for people who appreciate an unconventional approach to roofs.

Available in the CLASSIC SERIES, it is prepared for a dedicated project.

Ready mounting holes make installation much easier and faster. A wide range of coatings and colours or very long warranty periods, reaching up to 40 years for selected coatings, allow the FINN metal roof tile to boldly place itself among the most attractive BP2 products.

FINN - Technical parameters [mm]	
Effective width	1150
Overall width	1190
Sheet thickness	0,5
Overall height of the profile	43/48
Rib height for module 350	25/30
Rib height for module 400	25
Sheet length	min. 1070 max. 6110
Weight	~ 4,5 kg/m2
Tab length when dividing sheets	20

FINN

Product advantages

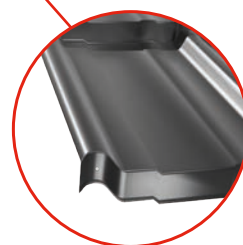

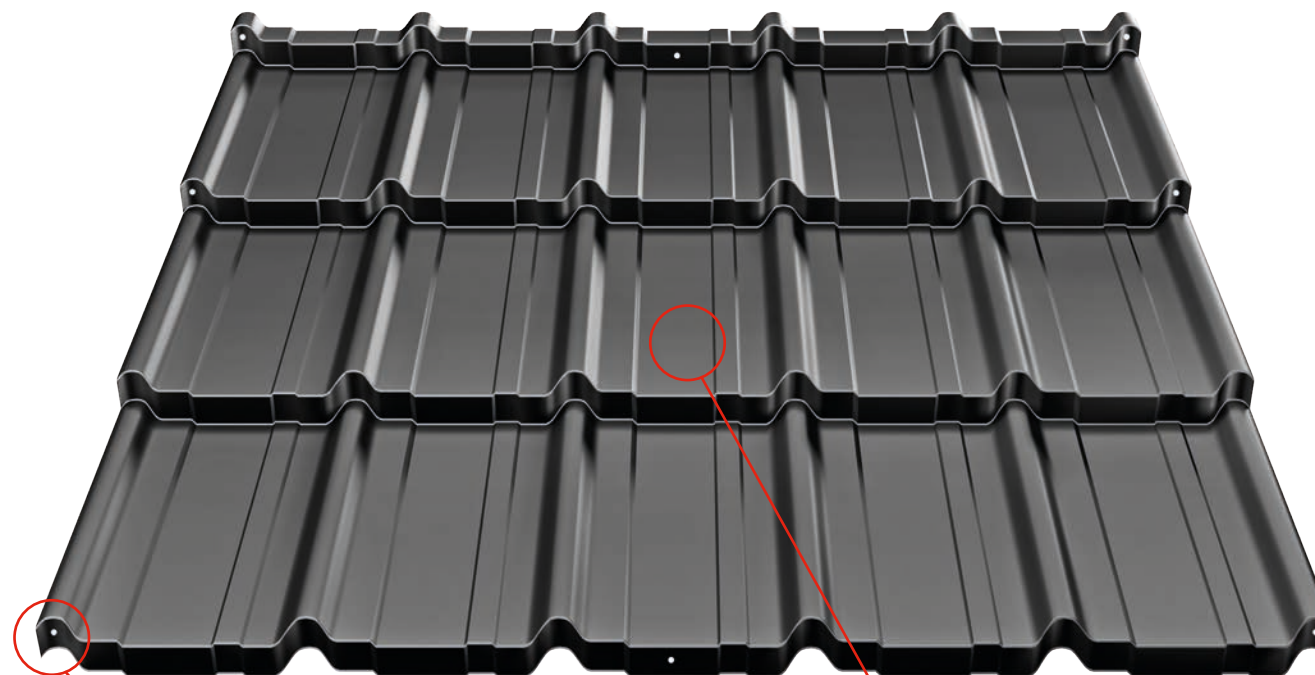

ATTRACTIVE WARRANTIES

The warranties provided, reaching up to 40 years, are the same as in other CLASSIC SERIES products.

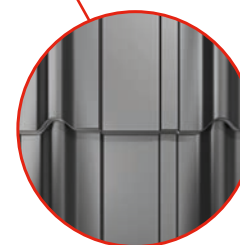

WIDE RANGE OF FINISHES

A large selection of colours and coatings, both for the flat version and the ribbed one, allow the FINN to be adapted to almost any project.

READY-MADE MOUNTING HOLES

Ready-made mounting holes significantly speed up and facilitate the work of roofers. (Applies to 30 mm rib height)

SYMMETRY

Installation in any direction. The construction of FINN classic roof tiles allows for their installation in any direction (from the left or right side).

The FINN 2.0 compact two-module metal roof tiles

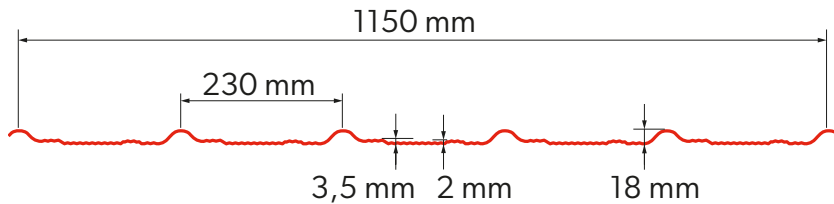

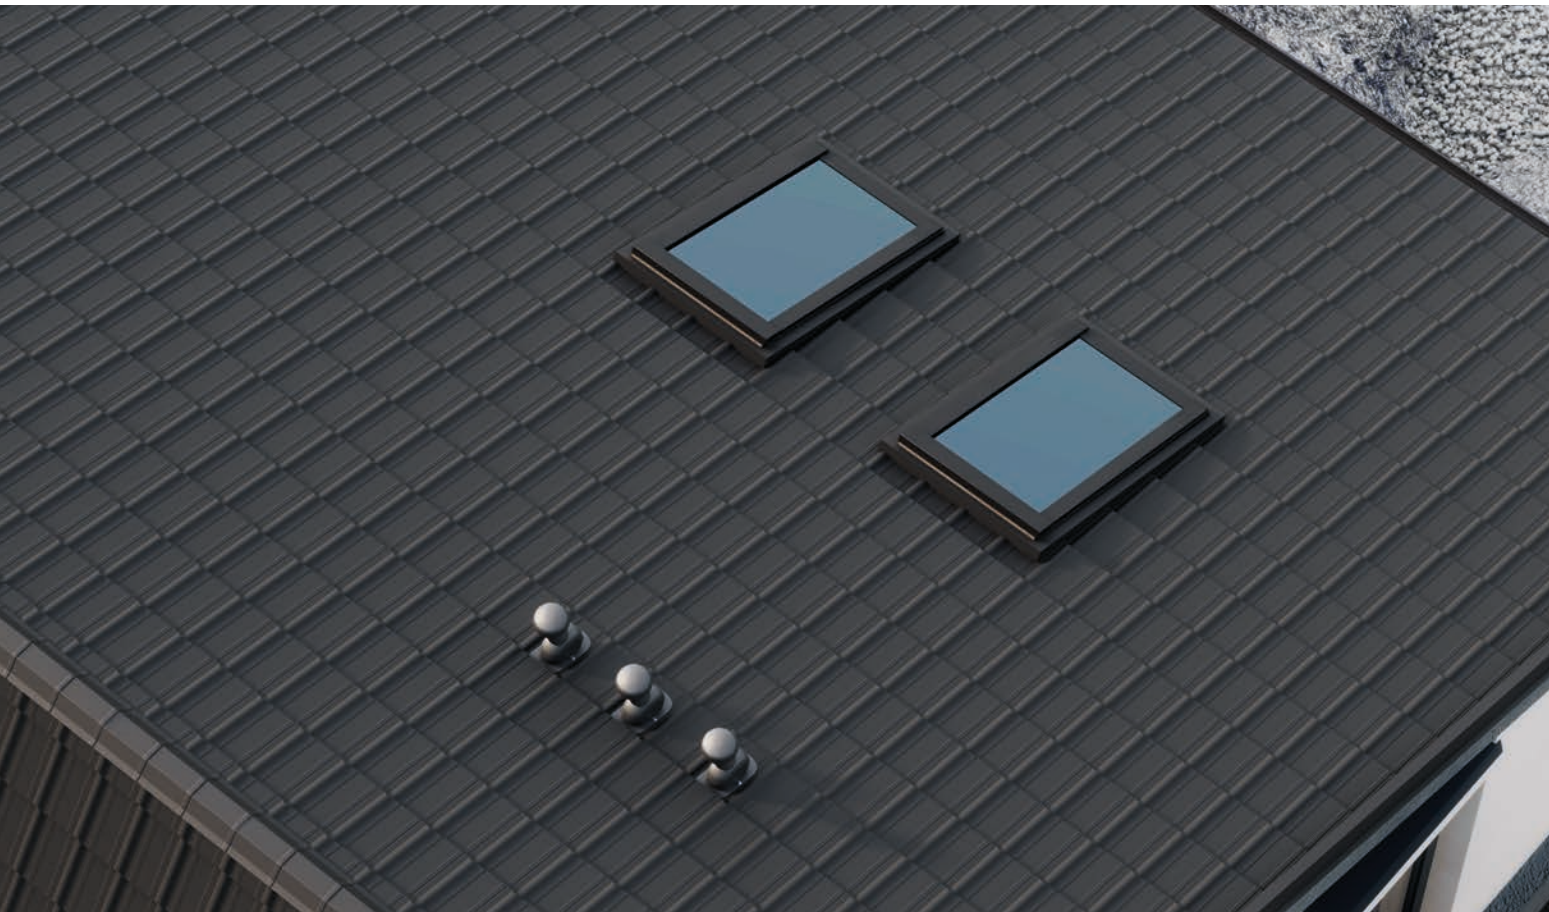

Technical information

The FINN 2.0 metal tile, a novelty in the BP2 offer, is a result of further modern technical solutions. Due to the unique aesthetics, the original profile is a product for people who appreciate an unconventional approach to roofs.

Available in the COMPACT SERIES, which is a very attractive version of metal roof tiles in the form of sheets, allowing for quick installation, easy transport, and convenient storage. In addition to the flat version, FINN 2.0 is available with impressive MICRO RIB longitudinal ribbing, being the first metal roof tile in our offer with such a finish.

Ready-made mounting holes make installation much easier and faster, and their symmetry means that the sheets can be installed from any direction, which improves the comfort of the roofer's work. A wide selection of coatings and colours or very long warranty periods, reaching up to 40 years for selected coatings, allow the FINN 2.0 metal roof tile to boldly place itself among the most attractive BP2 products.

FINN 2.0 - Technical parameters [mm]	
Effective width	1150
Overall width	1190
Sheet thickness	0,5
Overall height of the profile	48
Rib height	30
Module lenght	350
Effective area (coverage) of a single sheet	0,805 m2
Weight	ok. 4,5 kg/m2
Tab length when dividing sheets	20

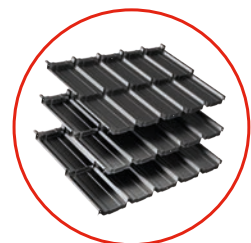

FINN 2.0

Product advantages

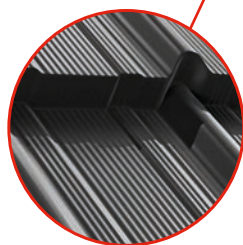

MODULARITY

Facilitates and speeds up installation. The form of two-module sheets facilitates loading, transport and unloading, and above all, facilitates and speeds up installation. Lightweight and compact sheets mean more convenient rooftop delivery and secure storage.

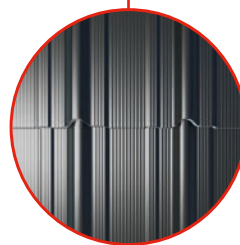

ATTRACTIVE WARRANTIES

The warranties provided, reaching up to 40 years, are the same as in other COMPACT SERIES products.

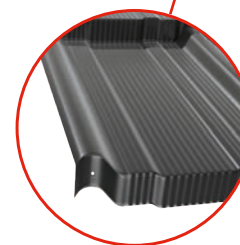

MICRO RIB PROFILING

FINN 2.0, as the first metal roof tile in our offer, is available with impressive MICRO RIB longitudinal ribbing.

SYMMETRY

Installation in any direction. The construction of FINN 2.0 compact roof tiles allows for their installation in any direction (from the left or right side).

READY-MADE MOUNTING HOLES

Ready-made mounting holes significantly speed up and facilitate the work of roofers

COMPACT SERIES

UNIQUE AESTHETICS

Thanks to two finishing versions: flat and MICRO RIB with longitudinal ribbing, FINN 2.0 is an excellent solution for not only classic, but also unconventional projects.

WIDE RANGE OF FINISHES

A large selection of colours and coatings, both for the flat version and the ribbed one, allow the FINN 2.0 to be adapted to almost any project.
